

GOWTHAM M

COMPUTER SCIENCE ENGINEERING STUDENT · FULL-STACK DEVELOPMENT

9080143870 | goww991@gmail.com | Tamil Nadu, India | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Pre-final year Computer Science student specializing in full-stack development with Java, Spring Boot, and React, with a track record of five independently built full-stack systems — from a Redis-backed real-time messaging platform to a Stripe-integrated learning marketplace. Skilled across the full delivery cycle: schema design, secure REST/WebSocket APIs, JWT authentication, and frontend integration and deployment.

EDUCATION

B.E. Computer Science and Engineering

IFET College of Engineering | Expected 2028 | CGPA: 7.9 / 10

TECHNICAL SKILLS

Languages: Java, JavaScript / TypeScript, SQL

Backend: Spring Boot, Spring Security, REST APIs, JWT Authentication, WebSocket (STOMP)

Frontend: React, HTML5 / CSS3, Responsive UI

Database & Infra: MySQL, PostgreSQL, Redis, Flyway

Tools: Git & GitHub, Vercel, Postman

PROJECTS

MediFlow — Healthcare Workflow Platform

React • Spring Boot • MySQL • REST API

- Engineered a backend service layer to coordinate patient-care workflows across staff roles, with a structured relational schema for cases and status transitions.
- Built a React front end for day-to-day clinical and administrative operation on top of a REST API integration layer.

Chirp — Real-Time Messaging Platform

React • TypeScript • Spring Boot • PostgreSQL • Redis • WebSocket

- Architected real-time 1-to-1 messaging over STOMP/WebSocket with live typing indicators, presence tracking, and read receipts.
- Designed a Redis-backed anonymous matchmaking engine with interest-based pairing and atomic session allocation to prevent race conditions.
- Implemented secure file sharing via presigned direct-to-object-storage uploads, with JWT-authenticated WebSocket handshakes.

TraceBack — Case Management & Reporting Platform

React • Spring Boot • MySQL • JWT • Flyway

- Originally built as a missing-persons reporting system, then generalized into a role-based case-management platform with a paginated REST API.
- Enforced per-IP rate limiting on authentication and case-filing endpoints to harden the system against abuse.
- Replaced automatic schema generation with versioned SQL migrations (Flyway) and added a dedicated evidence/photo-upload endpoint.

Picksy — Community Marketplace for Small Sellers

React • Spring Boot • MySQL • REST API

- Designed a community marketplace for small sellers, supporting seller listings, product discovery, and buyer ordering through a dedicated platform.
- Built seller and buyer workflows on a REST API backed by a relational product/order schema.

SkillForge — E-Learning Marketplace

React • Spring Boot • MySQL • Stripe • JWT

- Built a course marketplace with role-based auth (Student / Instructor) and JWT access + refresh token rotation.
- Integrated real Stripe Checkout with webhook-confirmed enrollment, with instant enrollment for free courses.
- Modeled course, enrollment, and review data behind a documented REST API covering 15+ endpoints.

EXPERIENCE

Frontend Developer Intern — OneYes Infotech Solutions Pvt. Ltd.

26 Dec 2025 – 9 Jan 2026

- Designed the UI/UX for an e-learning platform in Figma, including wireframes and screen flows, as part of a frontend-focused internship project.

ACHIEVEMENTS

- HackIndia 2026 — Team Phoenix Warriors (Mailam Engineering College): Built a missing-persons reporting system from concept to demo within the hackathon timeframe, with 4 teammates — the prototype that later evolved into TraceBack.

CERTIFICATIONS

- Programming in Java — NPTEL (IIT Kharagpur), 83% — Elite
- CCNA: Introduction to Networks — Cisco Networking Academy
